1st Class Maths: June 2nd – 5th 2020

Hi Everyone.

We hope our 1st class children had a lovely June bank holiday weekend and that you all enjoyed the glorious weather. We have a lovely, enjoyable topic in maths this week to ease you back into a little work. Over the coming days the children will be learning about capacity, i.e. the measure of the amount of liquid different containers can hold. Each child needs to know the language of capacity: holds more/less, holds most/least, fewer, container, full, empty, nearly full, nearly empty, not as full as, estimate, measure, pour, match, fill, litre, more/less than a litre, about a litre.

We will complete pages 137 to 140 in the Busy at Maths textbook. It might be an idea to do some of the 'measuring activities' outside where a spill might not cause as much trouble! Some of the pages in this section will be easily completed by the children. It would be a good week to complete the puzzles on page 129 and 130 if any of the children are feeling enthusiastic.

Outline of Work:

Tuesday June 2nd: Page 137: Explore the language of capacity.

Wednesday, June 3rd: Page 138: Estimate; Measure; Record.

Thursday, June 4th: Page 139: Pictogram based on Capacity

Friday, June 5th: Page 140: The litre
